

Abstract

The present invention relates to a method for loading money from money loading means (15) to money depositing means (1). In the method, money is deposited in electrical form. In the method, a loading condition is determined. Further in the method, a signal transmitted by the money loading means (15) is received, and said loading condition is examined. Thus, if the loading condition is fulfilled and if the signal transmitted by the loading means (15) can be received, money is loaded automatically.
